

**NEW JERSEY DEPARTMENT OF ENVIRONMENTAL  
PROTECTION**

**REPORT OF TELEPHONE CALL**

**BUREAU OF ENVIRONMENTAL MEASUREMENTS AND SITE ASSESSMENT  
RESPONSIBLE PARTY INVESTIGATION UNIT**

**DATE:** January 9, 2008

**TIME:** 4:00 PM

**CASE NAME:** Margarets Creek Lead Contamination, Old Bridge, Middlesex Co.

PI: 434324

**PERSON CONTACTED:** Chris Reitman

**PHONE :** 610/840-9123

**AFFILIATION:** Advanced Geoservices, consultant to NL Industries

**SUBJECT OF CALL**  : Margarets Creek Lead Contamination, Old Bridge, Middlesex Co. PI: 434324

**SUMMARY OF CALL**  : Mr. Reitman called to determine possible sources of information that may provide additional information concerning activities at the subject site. Mr. Reitman was specifically looking for information relative to other generators of waste materials disposed of in the area and activities related to construction of the sea wall. I explained that the documents we found concerning the disposal activities were in the old water pollution control files. I indicated that whatever information we found relative to the site was in the file which had already been reviewed by NL Industries. I advised Mr. Reitman that there may be other files however, it is difficult to say exactly where any such files may currently reside; I suggested that he contact the coastal program for information relative to the sea wall construction.

**SIGNATURE:**

  
Robert Beretsky
